PROFESSIONAL SUMMARY

Recent BSc Information and Communication Technology graduate (2023) with 3+ years of hands-on experience in enterprise IT infrastructure, systems administration, and technical support across banking, utility, and government sectors. Proven track record managing Windows Server environments, Active Directory, virtualization platforms, and database systems while supporting 200-1,500+ concurrent users. Expertise in Linux systems administration, VMWare/Hyper-V virtualization, enterprise networking, and hardware troubleshooting. Skilled in delivering technical training, creating comprehensive documentation, and providing exceptional customer service. Strong problem-solving abilities with certification in Git version control and continuous professional development in emerging technologies. Ready to contribute immediately to IT infrastructure projects and support organizational technology needs.

CORE TECHNICAL SKILLS

Systems Administration & Virtualization

- Linux Administration: FedoraOS, Ubuntu - System configuration, package management, shell scripting
- Windows Server: 2012/2016/2022 - Installation, configuration, maintenance, performance optimization
- Virtualization: VMWare ESXi, Hyper-V, deployment, resource allocation, snapshot management
- Active Directory: ADDS, Group Policy, DNS, DHCP - User/group management, GPO configuration, domain services
- System Monitoring: SCOM, SCCM, SCSM - Performance monitoring, patch management, incident tracking

Server Hardware & Storage

- Enterprise Servers: HP ProLiant - Hardware diagnostics, component replacement, RAID configuration
- Storage Systems: NAS, DAS - Configuration, backup management, capacity planning
- Hardware Troubleshooting: Component-level diagnostics, system rebuilds, preventive maintenance

Networking & Security

- Network Infrastructure: LAN/WAN, Ethernet, WiFi - Configuration, troubleshooting, optimization
- CISCO Systems: IP Phones, switches, routers - Integration, monitoring, VoIP configuration
- Firewalls & VPN: Perimeter security, remote access, network segmentation
- Security Protocols: Access control, antivirus management, CCTV systems, threat detection

Database & Cloud Platforms

- Database Systems: SQL Server, MySQL, SAGE Evolution ERP - Administration, backup/recovery, optimization
- Microsoft 365: Exchange Online, SharePoint, Teams, Microsoft Azure, Power Automate - Administration, user management
- Business Intelligence: PowerBI, MongoDB - Dashboard development, data visualization, reporting

Technical Support & Documentation

- Customer Relations: Help desk support, first-call resolution, technical training delivery
- Technical Documentation: System procedures, user manuals, troubleshooting guides, Root Cause Analysis reports
- Software & Tools: Microsoft Office Suite, Git version control, system backup utilities, remote support tools

PROFESSIONAL EXPERIENCE

CORPORATE SYSTEMS ADMINISTRATION INTERN

Electricity Supply Corporation of Malawi (ESCOM) | Lilongwe, Malawi | October 2024 – September 2025

Systems Administration & Infrastructure Management

- Supported enterprise IT infrastructure serving 1,500+ concurrent users, contributing to 99.5% system uptime through proactive monitoring, rapid incident response, and preventive maintenance across Windows Server environments (physical and virtual machines)
- Configured Active Directory Domain Services for 1,500+ user accounts, implementing Group Policy Management to enforce security standards and access controls, reducing unauthorized access incidents by 95%
- Deployed DNS and DHCP configurations ensuring reliable network resource distribution for 1,500+ network devices, eliminating 100% of manual IP configuration errors and reducing deployment time by 60%
- Administered Windows Server 2012/2022 environments with zero critical system failures during 12-month tenure, ensuring continuous service delivery for mission-critical business applications

System Monitoring & Problem Resolution

- Deployed System Center Operations Manager (SCOM) across enterprise infrastructure, identifying potential system failures 48 hours in advance and enabling preventive remediation before outages occurred
- Configured System Center Configuration Manager (SCCM) for software deployment and patch management across 1,500+ devices, reducing deployment time by 40% and achieving 100% patch compliance within 15-day windows
- Implemented System Center Service Manager (SCSM) ticketing system, processing 10+ complex technical support tickets with Microsoft engineers with average resolution time of 4 hours, maintaining SLA compliance
- Detected security vulnerabilities through continuous SCOM monitoring, preventing 3 potential cybersecurity breaches and estimated $10,000+ in downtime costs

Microsoft 365 & Database Administration

- Administered Microsoft 365 environment including Exchange Online (1,500+ users), SharePoint collaboration sites, Teams platform, and Power Automate workflows for business process automation
- Optimized SharePoint Online interfaces, reducing navigation time by 30% and increasing user adoption from 45% to 95%, resulting in 50% increase in daily platform utilization
- Administered SQL Server and MySQL databases with 100% data integrity and zero data loss incidents over 12-month tenure, executing weekly backup procedures for comprehensive disaster recovery
- Optimized database queries and restructured schemas for high-volume reporting systems, achieving 35% performance improvement and faster business intelligence analysis
- Developed 3+ interactive PowerBI dashboards with MongoDB integration, reducing report generation time by 40% and improving executive decision-making cycle from 5 days to 2 days

Technical Training & Documentation

- Developed and delivered ICT training programs for government interns on Microsoft Office, network troubleshooting, and system administration, achieving 100% course completion with positive feedback
- Created comprehensive technical documentation including system procedures, user manuals, and troubleshooting guides, improving first-call resolution by 25% and reducing support tickets by 30%
- Collaborated with external auditors achieving 100% compliance with regulatory requirements and zero security audit findings through detailed documentation and governance controls

IT SPECIALIST INTERN

Malawi Energy Regulatory Authority (MERA) | Lilongwe, Malawi | June 2023 - May 2024

Server Infrastructure & Network Management

- Led critical server infrastructure upgrade, migrating 5 enterprise servers from Windows Server 2012 to 2022, achieving 35% performance improvement, enhanced security compliance, and extending infrastructure lifecycle by 5 years
- Configured Active Directory Domain Services for 200+ user accounts across multiple locations, implementing Group Policy Management for consistent security enforcement
- Integrated and monitored 150+ CISCO IP phones across organizational network, establishing communication infrastructure with 98% uptime for 200+ staff members
- Administered LAN/WAN operations across distributed office locations, achieving 98% network uptime and reducing network-related support tickets by 35%
- Configured Ethernet infrastructure and WiFi access points across multiple offices, ensuring reliable connectivity and remote work capabilities

Storage & Database Administration

- Configured Network Attached Storage (NAS) systems managing centralized storage with user access controls for 200+ concurrent users
- Managed SAGE Evolution ERP database systems with weekly backup procedures, maintaining 100% data integrity for financial and operational modules with zero reporting errors

- Implemented database security protocols for sensitive financial data, achieving 100% regulatory compliance during external audits with zero security findings

Security Management & IT Projects

- Managed organizational CCTV security systems, detecting and apprehending security threat through systematic surveillance analysis, protecting organizational assets and ensuring staff safety
- Implemented network security monitoring and antivirus management protocols, detecting and preventing security threats in real-time
- Led digitization project team of 8 interns, converting 5,000+ physical records to searchable digital archive, improving document retrieval time by 80%
- Developed Systems Requirements Specification (SRS) for ICT Geo-Mapping application procurement valued at $30,000, ensuring alignment with organizational objectives
- Delivered technical training programs on email systems, Microsoft Office, and network security, achieving high user competency and reducing support tickets by 25%

TECHNICAL SUPPORT TECHNICIAN

National Registration Bureau (NRB) | Lilongwe, Malawi | October 2024 - November 2024

- Diagnosed and resolved hardware failures and software conflicts on electoral registration equipment, supporting successful voter registration of 50,000+ citizens across multiple centers

SYSTEMS DEVELOPER (PART-TIME CONSULTANT)

Palm Technologies Inc. | Lilongwe, Malawi | January 2023 – Present

- Architected and deployed government-compliant web platform for Office of Director of Public Officers' Declarations (declarations.gov.mw) with role-based authentication and encrypted data storage
- Developed e-commerce website and CMS for retail client with integrated inventory management and financial reporting functionality(trendythreads.kesug.com)
- Implemented secure authentication systems and database encryption protocols ensuring compliance with data protection regulations

EDUCATION

Bachelor of Science in Information and Communication Technology

Daeyang University | Lilongwe, Malawi | Graduated 2023

Specialization: Software Development and Database Systems

Malawi School Certificate of Education (MSCE)

Michiru View Secondary School | Blantyre, Malawi | 2016

16 Points

PROFESSIONAL CERTIFICATIONS & TRAINING

- Git Version Control and Collaborative Development Training – Microsoft Personnel-Led Workshop (2024)
- Continuous Professional Development – Udemy, Coursera (Ongoing) - Systems Administration, Virtualization, Cloud Technologies

KEY ATTRIBUTES & COMPETENCIES

- Strong Hardware Knowledge: Enterprise servers (HP ProLiant, Dell PowerEdge), storage systems, component-level troubleshooting
- Excellent Customer Relations: Proven track record delivering technical training, providing help desk support, and maintaining high user satisfaction
- Technical Writing: Experienced creating Root Cause Analysis reports, system documentation, user manuals, and troubleshooting guides
- Flexible Work Schedule: Willing and able to work odd hours as work demands, including weekends and emergency on-call support
- Problem-Solving: Strong analytical abilities with systematic approach to troubleshooting complex technical issues
- Team Collaboration: Experience working with cross-functional teams, external vendors, and Microsoft support engineers

LANGUAGES

- English: Excellent proficiency (Speaking, Listening, Reading, Writing)
- Chichewa: Native fluency (Speaking, Listening, Reading, Writing)
